

講演会のお知らせ

「東ユーラシア・環日本海域国際環境セミナー」

日時：2016年12月14日（水） 10:30-11:45

場所：金沢大学角間キャンパス 自然科学本館203講義室

講演題目：

The uncultured majority of the hidden world: Microbial ecology in diverse and poorly-understood environments - significance, challenges, and discoveries.

講演要旨：

Microorganisms are present in almost every imaginable environment; from extremes such as geothermal systems in New Zealand to hyperarid Antarctic Dry Valley. Even in the air that we breath, there are tiny lifeforms travelling through the atmosphere. These organisms, often poorly understood, play important roles in every aspect of our lives as well as the global biological system. In this presentation, I will outline the microbial ecological research efforts from AUT (Auckland University of Technology) in understanding the identities and functions of microorganisms.

講師：

Dr. Kevin C Lee

オークランド工科大学

Auckland University of Technology

Institute of Applied Ecology New Zealand

対象：一般、学生

使用言語：英語

世話人：長谷部徳子（環日本海域環境研究センター）
