The 8th International Thematic Symposium “Environment and the Sustainable Development of Rural and Urban Societies in East Asia”

15th March 2024
National University of Management,
Phnom Penh, Cambodia

About the Symposium

Pursuant to NUM's vision to promote research through national and international cooperation, the Center of Excellence for R&D and Innovation (CERI) of the National University of Management (NUM) is of great honor to host the 8th International Thematic Symposium “Environment and the Sustainable Development of Rural and Urban Societies in East Asia” under the academic cooperation with the Department of Inter-institutional Collaboration, Institute of Nature and Environmental Technology, Kanazawa University, Japan.

This Symposium aims to:

- Promote the understanding of scientific theories together with policies on environment, sustainable development and urban development in Asia;
- Promote capacity building of professors and researchers through exchange of research findings through international symposium; and
- Promote the study and research on environmental science and policy.

The target audiences of the symposium include professors, researchers, lecturers, students and those who are interested in field of environmental science, smart city planning management, and public policy. The maximum number of participants is 100.
